

Zeya Karim

Software Engineer • Full Stack • Backend • Python • Cloud & DevOps

✉ zeyakarim79@gmail.com | ☎ +91 8570877219 | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio | 📍 Bihar, India

Professional Summary

Software Engineer with **4+ years of professional experience** designing, developing, deploying, testing, and maintaining scalable software systems across **e-commerce, logistics, warehouse management, real estate, business operations, and engineering automation** platforms. Experienced in full-stack and backend development using **Python, FastAPI, React.js, Next.js, TypeScript, Node.js, PostgreSQL, AWS, Docker, and CI/CD**. Strong expertise in microservices, distributed systems, REST APIs, event-driven architecture, cloud infrastructure, database optimization, file processing, and production systems. Proven ability to lead engineering initiatives, mentor developers, collaborate with cross-functional teams, and deliver secure, scalable, and high-performance production-ready software in Agile environments.

Technical Skills

Languages	Python, JavaScript, TypeScript, SQL
Frontend	React.js, Next.js, Redux, TanStack Query, Tailwind CSS
Backend	Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, RabbitMQ, Socket.io
Databases	PostgreSQL, PostGIS, MongoDB, Redis, Prisma ORM, Sequelize ORM
Cloud & DevOps	AWS (EC2, RDS, S3, CloudFront), Docker, GitHub Actions, Nginx, PM2, Cloudflare R2
Python Tools	OpenCV, NumPy, Pillow, PDF Processing, OCR, DXF/DWG Parsing
Architecture	System Design, Microservices, Distributed Systems, Event-Driven Architecture
Testing	Jest, Unit Testing, API Testing, Debugging, Troubleshooting
Tools	Git, GitHub, Jira, Razorpay, Google Maps API, Shopify GraphQL, Puppeteer

Work Experience

Sappey Foods PVT. LTD.

Jammu (Remote)

Founding Full Stack Engineer

Mar 2026 – Present

- Led architecture and development of a unified commerce platform supporting **direct-from-source B2B, B2C, and D2C operations** using **React.js, TypeScript, Node.js**, and **PostgreSQL**.
- Built premium customer storefronts and internal admin systems supporting **real-time inventory precision**, dynamic pricing engines, and multi-channel catalogs.
- Integrated **Razorpay payment gateway** with automated webhook verification, routing, and transaction processing pipelines.
- Managed production infrastructure and deployments using **Linux VPS, Nginx, PM2, Cloudflare R2**, reverse proxy configurations, process management, and application troubleshooting.
- Collaborated on high-level **system design**, sprint execution, technical roadmap prioritization, feature architecture, and production problem-solving.

GWARM Technologies PVT. LTD.

Jaipur, India

Senior Full Stack Engineer

Apr 2025 – Mar 2026

- Led and mentored a **6–7 member engineering team**, driving clean functional patterns, code quality, sprint delivery, and technical architecture across full development lifecycles.
- Architected an enterprise-grade ecosystem combining **e-commerce, warehouse management, and logistics operations** tracking from creation through optimized final delivery.
- Built highly scalable **microservices**-based backends with **Node.js, PostgreSQL**, and **RabbitMQ** message queues

for asynchronous and decoupled processing.

- Integrated **Google Maps API** and **PostGIS** to support real-time fleet tracking, geospatial queries, distance-based location sorting, optimized routing, and cash-on-delivery (COD) reconciliation workflows.
- Designed and maintained automated **CI/CD pipelines** using **GitHub Actions** for AWS deployments, improving deployment consistency, release automation, and production reliability.

DEPO24

Delhi, India

Full Stack Developer

Sep 2022 – Feb 2025

- Collaborated closely within a fast-paced **Agile** team, participating in peer code reviews, debugging, and continuous software delivery.
- Engineered a full-stack building materials marketplace managing a production database of **5,000+ dynamic SKUs**, multi-role vendor panels, and granular admin permission systems.
- Connected **Shopify GraphQL APIs** and **Vinculum** middleware solutions for instant, multi-warehouse inventory synchronization.
- Successfully migrated legacy database architecture from **MongoDB** to transactional **PostgreSQL** using **Sequelize ORM**, improving complex query performance and cross-table consistency.

Coding Ninjas

Delhi, India

Teaching Assistant

Feb 2022 – Sep 2022

- Mentored **400+ students** in core software architecture concepts, full-stack JavaScript development, and system design workflows.

Technical Projects

AI Fire Protection Takeoff Platform

Jul 2026 – Present

Independent Project

Source Code

- Built an AI-powered engineering automation platform that analyzes **DXF, DWG, PDF, and image-based fire protection drawings** to automatically detect engineering symbols and generate accurate quantity takeoff reports.
- Developed a high-performance backend using **Python, FastAPI, OpenCV, NumPy**, and **ezdxf** for CAD parsing, computer vision, PDF processing, and automated symbol detection.
- Designed scalable REST APIs supporting engineering drawing uploads, legend extraction, quantity reconciliation, CSV report generation, and production-ready file processing workflows.
- Implemented OCR fallback, Cloudflare R2 object storage, and optimized processing pipelines capable of handling large engineering drawings with improved accuracy and performance.
- Built a responsive React dashboard supporting drag-and-drop uploads, real-time processing status, mismatch detection, and downloadable engineering reports.

Education

Yamuna Institute of Engineering and Technology

Jul 2017 – May 2021

B.Tech in Computer Science and Engineering

First Class with Honours
