

Zeya Karim

Software Engineer • Full Stack • Backend • Cloud & DevOps

zeyakarim79@gmail.com • +91 8570877219 • Portfolio • GitHub • LinkedIn • Delhi, India

PROFESSIONAL SUMMARY

Software Engineer with **4+ years of experience** designing, building, and deploying scalable full-stack web applications using React.js, Next.js, Node.js, Express.js, TypeScript, PostgreSQL, MySQL, and MongoDB. Experienced in developing reusable user interfaces, secure REST APIs, database-driven applications, third-party integrations, and cloud deployments on AWS and Linux servers. Strong understanding of Redux Toolkit, Context API, authentication, responsive web design, and Agile software development.

WORK EXPERIENCE

- **Sappey Foods PVT. LTD.** *Jammu (Remote)*
Full Stack Engineer (Part-Time) *Mar 2026 – Present*
 - Independently architected, developed, and deployed a unified commerce platform end-to-end as the **sole engineer** — from system design through production deployment — supporting B2B, B2C, and D2C workflows including authentication, products, inventory, orders, and payments.
 - Built responsive React.js customer storefronts and admin dashboards using reusable components, Context API, protected routes, role-based access control, and optimized state management for inventory, pricing, and order management.
 - Designed a modular backend architecture with REST APIs for authentication, inventory, orders, payments, and reporting, enabling scalable feature development and maintainability.
 - Managed Linux production deployments using Nginx, PM2, SSL, Cloudflare R2, and CI/CD workflows while monitoring application performance and uptime.
- **GWARM Technologies PVT. LTD.** *Jaipur, India*
Senior Full Stack Engineer *Apr 2025 – Feb 2026*
 - Led and mentored a **6–7 member engineering team**, building a Next.js-based super admin portal and deploying infrastructure on AWS (EC2, S3, RDS) with automated CI/CD pipelines via GitHub Actions.
 - Designed and developed scalable Node.js microservices and REST APIs using Express.js, PostgreSQL, and RabbitMQ to support high-throughput business operations.
 - Integrated Google Maps API and PostGIS to implement real-time fleet tracking, geospatial search, route optimization, distance-based sorting, and cash-on-delivery (COD) reconciliation.
 - Synchronized orders, inventory, and shipment data by connecting third-party platforms including Salla (e-commerce, via App IDs/webhooks/REST APIs) and SMSA Express (shipping/carrier API) with the internal order management system.
- **DEPO24** *Delhi, India*
Full Stack Developer *Sep 2022 – Feb 2025*
 - Designed, developed, and maintained a production-grade React.js, Node.js, and Express.js marketplace managing 5,000+ products, vendor portals, customer workflows, and role-based administration.
 - Connected Shopify GraphQL APIs and Vinculum middleware solutions for instant, multi-warehouse inventory synchronization.
 - Migrated legacy database architecture from MongoDB to transactional PostgreSQL using Sequelize ORM, improving complex query performance and cross-table consistency.
- **Coding Ninjas** *Delhi, India*
Teaching Assistant *Feb 2022 – Sep 2022*
 - Mentored **400+ students** in core software architecture concepts, full-stack JavaScript development, and system design workflows.

TECHNICAL PROJECTS

- Sappay Commerce Platform

Independent Full Stack Project

Mar 2026 – Present

Live Demo
- Designed and developed a production-ready full-stack commerce platform using React.js, TypeScript, Node.js, Express.js, PostgreSQL, and Supabase supporting B2B, B2C, and D2C workflows.
 - Designed reusable React.js architecture using TypeScript, Context API, protected routes, and modular component patterns for customer and admin applications.
 - Developed secure REST APIs for authentication, products, inventory, orders, payments, and reporting with optimized database queries and scalable backend architecture.
 - Integrated Razorpay payment gateway, Cloudflare R2 storage, email notifications, and third-party logistics APIs.
 - Designed normalized PostgreSQL schemas, optimized SQL queries, and implemented indexing strategies to improve application performance and scalability.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, SQL, Python
- **Frontend:** React.js, Next.js, Redux Toolkit, Context API, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Socket.io, RabbitMQ
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Supabase, Sequelize
- **Cloud & DevOps:** AWS (EC2, S3, RDS), GitHub Actions, Nginx, PM2, Cloudflare R2
- **Testing:** Jest, Unit Testing, API Testing
- **Tools:** Git, GitHub, Postman, Razorpay, Google Maps API, Shopify GraphQL

EDUCATION

- Yamuna Institute of Engineering and Technology

B.Tech in Computer Science and Engineering

First Class with Honours

Yamunanagar, Haryana

Jul 2017 – May 2021
